### OBJECTIVE

Plant Pathology graduate from MNS University of Agriculture, Multan, with hands-on experience in crop scouting, disease identification, demonstration plot management, and field reporting. Certified by FAO in plant protection and plant genetic resources. Seeking a field-based role in agriculture, crop protection, seed science, or environmental compliance to apply academic knowledge and practical field skills in a professional setting.

### PROFESSIONAL EXPERIENCE

- The Urban Unit, Government of Punjab, Survey Enumerator — PSER Project** 08/2025 – 03/2026 | Punjab, Pakistan
- Conducted structured field surveys across multiple zones under Punjab Socio-Economic Registry (PSER)
  - Maintained accurate sample records, coding, labeling, and real-time digital data entry throughout the project
  - Ensured full SOP compliance, data quality standards, and timely reporting to supervisors at all times
  - Coordinated with team leads and escalated field issues promptly across all survey phases
- Agriculture Extension Department, Agriculture Extension Intern** 02/2024 – 05/2024 | Jahanian, District Khanewal
- Conducted 25+ field visits for crop scouting, pest identification, and disease monitoring across multiple crop varieties
  - Established and managed 3 demonstration plots — planned crop cycles, monitored growth stages, and documented performance outcomes
  - Implemented Integrated Pest Management (IPM) protocols ensuring safe and effective pest control and pesticide application
  - Delivered 5+ farmer training sessions on crop protection, IPM practices, and safe pesticide use — reaching 60+ farmers
  - Prepared detailed field reports and maintained complete documentation under senior extension officers

### EDUCATION

- B.Sc. (Hons.) Agriculture — Plant Pathology, MNS University of Agriculture, Multan** 2020 – 2024
- Relevant: Seed & Post-Harvest Pathology • Introductory Plant Breeding • Introduction to Seed Science • Genetics & Biotechnology • Diseases of Field Crops • Plant Disease Epidemiology • Mycology • Soil-borne Plant Pathogens • Pesticides, their Action & Application • Beneficial Microorganisms for Sustainable Agriculture
- F.Sc. Pre-Medical, Punjab College Jahanian** 2018 – 2020 | BISE Multan
- 844/1100 — 76.7%
- Secondary School Certificate — Science, Govt. High School Jahanian** 2015 – 2017 | BISE Multan
- 924/1100 — 84% | A+ External Grade

### KEY SKILLS

- Technical Agriculture Skills**
- Crop scouting, plant disease identification, and field crop performance evaluation
  - Demonstration plot establishment, monitoring, and crop trial management
  - Integrated Pest Management (IPM) and safe pesticide application protocols
  - Seed science, seed pathology, and post-harvest crop quality assessment
  - Field data collection, SOP compliance, sample labeling, and documentation
  - Environmental monitoring and sustainability compliance
- Software & Communication**
- MS Office Suite — Word, Excel, PowerPoint (PSDI Certified)
  - Farmer training, extension communication, and advisory services
  - Report writing, statutory record maintenance, and research documentation
